EXPERIENCE

Product Management Intern — Lobb Logistics *Bengaluru, India*

Jan 2026 – Jun 2026

- Worked on adding a truck filtering feature to improve the search experience for the user according to the freight requirements.
- Redesigned the truck booking user journey reducing the booking steps by 40%. And new transporter onboarding by 30%.
- Collaborated with engineering and sales teams to translate business problems into agile PRD for new truck filtering feature.
- Tracked and analyzed key B2C product metrics — conversion, retention, engagement — to identify drop-offs and drive product improvements. Supported A/B test to optimize user journeys.
- Conducted competitor and market research in the logistics B2C space.

Founding Product Lead — Scoobyzy *Remote*

Mar 2026 – Present

- Owned the product end-to-end — from ideation and requirement gathering to shipping a fully functional user and vendor app. Working directly with engineer and designer across the entire build cycle.
- Defined user flows, feature scope, and product roadmap by following agile methodologies. Saving engineering hours by 30%.
- Launched in Delhi NCR, June 2026 — managing pre-launch product readiness, QA coordination, and go-to-market strategies.
- Revenue growing 80% MoM showing great traction and product's market readiness.

PROJECTS

SUBTRACKR - Subscription Reminder Pro

[Live Link](#)

- Built a complete subscription-management platform with clean UX and simple communication flow.
- Conducted market research on subscription apps and user reminder behaviour.

AI Exam Planner Dashboard
